

Antibiotics Version B

Sometimes when you are _____, a doctor will _____ you a prescription for an antibiotic. An _____ is used to cure an _____ caused by bacteria. The antibiotic kills the _____ that are making you _____. Some _____ illnesses caused by bacteria are _____ infections, strep throat, pneumonia, _____, and urinary tract _____.

You can also get sick from a virus. Some common illnesses caused by viruses are colds and the flu. Viruses and bacteria are different. Taking an antibiotic for a sickness caused by a virus will not make you better and will not kill the virus.

_____ taking an antibiotic when you are _____ from a virus can _____ you. If you see a _____, you should _____ if you are sick from bacteria or a virus. The doctor will only _____ you an _____ if you are sick _____ bacteria.

If you are taking an antibiotic, it is very important to follow the directions. If you don't follow the directions, the bacteria can become stronger and can make you sick again. Some directions say to throw away the antibiotic after a certain number of days. Some directions say to take all of the medicine until it is gone.
