

The Last Time I Was Sick

I was sick last month. I went to the doctor because I felt very sick. I had a sore throat and I was congested. I had a cough and I was dizzy. I had a very bad headache. I could not breathe well, so it was difficult to sleep. I was fatigued. I also had a fever. The doctor told me that I had a sinus infection. I was not contagious, but I had to take antibiotics for one week.
