

What's Wrong?

1. You feel lightheaded and you think you will faint. What's wrong?

2. Your husband makes a whistling sound when he breathes. What's wrong?

3. You have a problem with your skin. Part of your skin is red and bumpy. What's wrong?

4. Your nose tickles. Eventually a quick push of air comes out and the tickling stops? What are you doing?

5. Even though you have a fever, you feel very cold. What's wrong?

6. Your arm feels prickly. It tickles and hurts at the same time. What's wrong?

7. Your daughter's nose is very full and it's hard to breathe. What's wrong?

8. When you go to the bathroom your stool is not solid—it is like water. What's wrong?

9. The skin on your arm feels uncomfortable. You want to scratch it to make it feel better. What's wrong?

10. Your wife's throat hurts. It hurts to swallow. What's wrong?

11. Your baby son cannot have a bowel movement (go to the bathroom). What's wrong?

12. Your daughter's body is very hot. Her temperature is over 98.6 degrees. What's wrong?

13. Your stomach feels sick. You feel like you need to vomit (throw up). What's wrong?

14. Your husband is having a hard time breathing. He cannot get enough air. What's wrong?

15. You cannot feel your foot. What's wrong (with your foot)?
